RE: The unlawful killing of Martin Lee Anderson  
at the Bay County boot camp in Jan 2006

FILED  
2:37 PM  
2:37  
FBI - TAMPA  
SEARCHED INDEXED SERIALIZED FILED

Dear Sir or Madam,

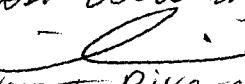

Greetings. I hope you are doing well. I know you are busy so I'll get right to the point. I have followed the case from the start. The firing of ~~the coroner~~ Guy Tunnell, the pathology report of Dr. Michael Baden, the national attention that the case has received, etc. I think you might be able to use this information. The guards at the boot camp charged in the alleged offense, displayed the telltale signs of a pharmacodynamic condition known as "Roid Rage". It develops when a person takes anabolic androgenic steroids like: Androstenidione (Andro), boldenone, Cestanon, decaestanone, ethylestrenol, formibolone, human Growth Hormone or HGH (has been illegally sold online by an Orlando Florida company by the name of "Signature Pharmacy," since 2000. Signature Pharmacy had nearly 3-million websites, where it sold HGH nationwide. Even pro-athletes came under fire for the purchase of HGH; including without limitation, the Pittsburgh Steelers team physician. Albany NY district atty P. David Soares, launched an investigation against Signature Pharmacy in Mar. 2007. And connected the dots to an Alabama partnership owned by 2008 presidential hopeful, M. Rudy Giuliani, by the name of "Applied Pharmacy."), Masterolone, Nandrolone, Nortestosterone, Prednisone, testosterone, THG, Testobolone acetate, etc.

The more common name for street steroids in northern Florida is "D-bol" or Dianabol. And if you need this information in a hurry, since the trial of the guards and the nurse begins 10.3.07., you can contact the US attorney for the Middle District (Fla., CM. Paul I-ferez). He handle the steroid bust at Florida state prison FSP where Officers Oscar Shiley, Michael Chambliss, Marcus Hodges, Bryan Griffis, and Benjamin Zoltowski. And an ex FSP guard Clayton Manning. The FBI and US customs busted this steroid ring in 2005. Manning was shipping anabolic steroids from Cairo, Egypt, disguised as commercial pharmacy shipments. Officer Benjamin Zoltowski was assigned to the FSP medical clinic. He learned about pharmacy packages from the medical staff (Dr. William Matthews, ARPN, Dr. Victor Selyutin, MD, Nursing Super Terra Battle, LPN Gwen Smith, LPN Barbara Sands, C-MTC Wassink, etc.). Other officers that had previously worked at FDOC Clinton pharmacy Camps NFRC, SFRC, ACI, & CFRC, learned about pharmacy shipments via Terry Jones & Associates (TJA), the FDOC pharmacy specialist/contractor. The FSP steroid ring was distributing illegal steroids as far away as the Okaloosa County jail. The nursing staff at FSP even supplied prison guards with drugs to help them build up their muscles. Different kinds of painkillers (Lortab, Vicodin, Oxycontin, Benztol, methadone, Fentanyl, etc.), muscle relaxers (flexeril, tunidel celebrex, gemfibrozil (before recall), Vioket (before recall)), Anti cogn-lants (Deprin, Coumadin, Warfarin, etc.), anti-inflammatory drugs (Albuterol sulfate, etc.), and other prescription medications. And that includes diuretic drugs (Lasix), and protein pump inhibitors, like Crestor, Lipitor, Prevacid, etc. The protein pump inhibitors (PPI) are used as a masking agent to hide positive blood-chemical doping tests for steroids. They got them from prison nurses. Prison nurses trade drugs for sexual favors from guards, especially the more unattractive women employees. As they're easier to manipulate. Here are a few more details:

prison doctors over-invoice prescription drugs. In many instances, these doctors are prescribing these drugs for ghost patients, prisoners that have died of degenerative diseases. Particularly those that do not have any family. Those who died anonymous deaths from cancer, fibrosis, multiple sclerosis, cerebral palsy, etc. Which lets these doctors prescribe anabolic steroids, and other drugware. I know a great deal about these matters. And I am being subjected to torture, and 3<sup>rd</sup> degree tactics by the Staff at Santa Rosa Correctional Institution, for sharing what I know with your office, and federal authorities. Tranquillizers (like Remeron, Geodon, Risperidol, Serquel, etc.) laced food, food cooked in tobacco extract, denied privileges, etc. The staff has not positively responded to my informal, formal grievances. The torture policy is a gimmick for extorting information. But they gets crone! You and the feds get it all. So what happens is that the prison doctors transmit the bogus prescriptions to NPLC, CFRC, SFRC & UCI (cluster pharmacies). Pharmacy specialist TMA processes them and in turn transmits them to FDOC pharmaceutical contractors - viz., Eli Lilly, Pfizer, GlaxoSmithKlein, Merck, Abbott Labs, Schering-Plough, Novartis, the drug products arrive at NPLC, SFRC, CFRC & UCI. TMA repackages the medications, and "returns" what FDOC doesn't want. Only the return addresses never match the shipping invoice addresses. They are actually ghost addresses for phantom drug + mail service drop boxes. The drugware is collected by designated couriers, and delivered to separate private systems such as: Wal-Mart stores inc, CVS Eckerd, etc. A&D, HCA, Signature pharmacy, Winn Dixie, Publix, etc.; when the drug products are repackaged and resold to the public at "discount" prices. This scheme violates the Dangerous Drug Diversion Control Act, 21 USC § 822(q). And turns the FDOC into a wholesale prescription drug distributor. Even though F. only has a restricted prescription drug distributor's permit. You can take from there.

I hope this information helps you out.

most cordially,

  
VINCENT Rivera
