deposition. I don't necessarily have to take a deposition if they answer the interrogatory. So the only thing I would ask, and I appreciate Mr. Whitten's concern, just order the State to answer interrogatory. That's it.

THE COURT: But I've already done that, and it isn't working. See, that's the problem.

MR. BARTLE: Well, I don't know if you have before. This is the first motion to compel on this. We would just ask you to sustain the objection, sustain the motion to compel, and order the State to provide the information the best they can. If they can't, then it says that in its interrogatory.

MR. WHITTEN: I can live with that if you're simply ordering us -- which I heard that part and we don't quarrel -- you have sustained 1 through 6 and you said, quote, To the extent possible. And we will answer it.

THE COURT: Let's leave it at that. Let's end it with Extent possible and leave it at that, because what that does, I guess, is to the extent possible and leaving it at that, you're going to get what you're going to get.

MR. BARTLE: If it's inappropriate, I'll come back to you. We'll deal with it later. But I would like the answer.

THE COURT: Well, of course, I'm trying to avoid some of that, but --

MR. BARTLE: I understand, your Honor.

in our letter. 1 This is Harvey. MR. BARTLE: If we're done talking about the 3 depositions, I don't know if everybody else wants to 4 stick on for this, but I'd like to talk about, as I 5 mentioned earlier, some of the plaintiff's discovery 6 7 responses to the Teva defendants. MR. BECKWORTH: Drew, can you handle that? 8 9 I need to run. You all can handle it and let me 10 know if you need me. 11 MR. PATE: Yes. Trey and I will handle that. 12 13 MR. BECKWORTH: Okay. I appreciate it. Everybody have a nice weekend. Thank you. 14 15 MR. BARTLE: Trey, I mentioned this in a call with Purdue earlier this week. Do you guys 16 17 have a date by which you're going to respond to Cephalon's second set of interrogatories? 18 MR. DUCK: Yeah. 19 This is Trey. I think that we're still looking 20 Yeah. 21 at the interrogatories and determining exactly what it is we need to do in accordance with Judge 22 23 Hetherington's rulings from the bench on the 31st. 24 I think that the earliest they could be or 25 we would be required to respond to them is 30 days

from that, from the order on the 31st. 1 2 Right now we're thinking that we'll have you supplemented responses, to the extent we need to 3 supplement any of them, on the 1st of October. 4 Now, I assume that would be okay with you. 5 But as I said, we're currently looking at them and 6 7 deciding what we need to do to supplement them. And, Harvey, I don't think either of us 9 wants to be back in court arguing about these exact same interrogatories again. So if we need a few 10 11 extra days, is it okay for us to reach out to you 12 and reasonably discuss that? 13 MR. BARTLE: Yes, absolutely, of course. One of the other things I want to talk to 14 15 you about was did the responses to the Actavis, LLC, Actavis Pharma and Teva Pharmaceuticals' second 16 interrogatories which you provided on the 17th --17 18 on the 7th of September, all the questions were 19 similar to the ones from the second Cephalon set, 20 and the answers that you gave to those 21 interrogatories were almost word for word the same 22 that you originally answered for Cephalon on which we moved to compel. 23 24 So I would ask you to take a look at

those interrogatories that you provided to me on

Re: Oklahoma v Purdue

Harvey, sorry for the delay. I mentioned in the meet and confer that the State may need a few extra days to answer. Then, the hearing regarding whether the State has to reveal the identities of patients and physicians was delayed. That hearing is now happening tomorrow afternoon. As you know, the interrogatories at issue seek patient and physician identities. We will supplement the interrogatories as soon as practicable after we get some clarification from the Court on revealing identities. Happy to chat more about this with y'all tomorrow at the hearing.

Thanks guys. Safe travels to OKC.

Trey and Drew,

At the end of the September 21, 2018 meet & confer, you said that the State would be providing on October 1 updated responses to Cephalon's Second Set of Interrogatories, for which Judge Hetherington granted our motion to compel on August 31st. When do you intend to provide those responses?

Thanks

Harvey

hearing.

THE COURT: I don't have a problem with that. That's okay.

MR. PATE: I obviously don't know what their response is going to say, your Honor. I find it hard to believe that they're going to file a response that says that they actually produced all this information to us about Rhodes Pharma that they weren't able to explain or talk about at the last hearing, so I don't know what impact it would have on the order.

But if your Honor's going to allow them to file a response, I think the first plan that you set forth makes the most sense to us, that they file a response, and if you need to -- if you feel like you need to modify the order you just entered, then you can modify it. Otherwise, it stands.

THE COURT: I think it is best to withdraw that part of the order, and let me just go ahead and consider the objection and I'll enter an order separate and relevant only to that.

MR. PATE: Only on our second motion to show cause for Rhodes Pharma?

THE COURT: That's correct.

MR. COATS: Thank you, your Honor.

MR. MERKLEY: Your Honor, if I may. I have one real small thing, and it relates to the motion you've heard today.

We don't want to file, you know, motions for sanctions or

anything like that. And I think the Court can give us some guidance right now on this one particular issue to clear it up.

As you may recall on August 31st, you heard our Cephalon motion to compel responses to a number of interrogatories, and you ordered the State to respond. The State didn't respond. We had a motion. We had a subsequent meet and confer, and the State told us they would get us responses by October 1st. We said fine.

We followed up yesterday when we didn't get responses by October 1st, and we were told by the State that, Well, some of the issues that you're going to deal with today with respect to the doctor and patient information affects some of the responses, so we don't have the responses yet.

Your Honor, what we would like from the Court is some guidance. First of all, not all of those interrogatories -- matter of fact, the majority of them did not deal with the doctor and patient information, don't relate whatsoever.

So we would like some guidance from the Court on giving the State a hard deadline to go ahead and respond. You've already ordered them to respond subject to a -- on a motion to compel.

THE COURT: When was that entered?

MR. MERKLEY: That was from the hearing on August 31st, and you made that ruling on the record.

And then to the extent the State believes that your ruling

from today's hearing actually affects the responses to one or two of those interrogatories, we would ask that you order the State to respond to those one or two within, say, three days, five days of your ruling on the issue that you heard today.

THE COURT: Who's dealing with that?

MR. MERKLEY: Not asking for any admonishments or sanctions or anything like that; just some guidance so we can get the information to get on with this case.

MR. DUCK: Couple of things. I don't think Nick will disagree with anything I'm about to tell you. We had a very amicable meet and confer on this. That meet and confer was before the hearing got moved. We didn't know this hearing was going to get moved, so we thought this hearing was going to occur last week.

We had a meet and confer before that. And I told Nick and Harvey we anticipated getting answers to these interrogatories to them by October 1st, but I might need to ask for a little extra time, and they agreed with that.

Then the hearing got moved after the meet and confer. It didn't occur to me then, but then when they sent the e-mail yesterday, I probably should have said to them, Hey, since the hearing got moved, we need to reassess the timing on these interrogatories. I didn't do that.

But we will answer these interrogatories. The truth of the matter is the interrogatories specifically request -- not

all of them, but some of them -- request patient names and physician names.

So we really can't answer those interrogatories that do involve that because we haven't gotten your Honor's ruling yet. Our thought was, Why answer a set of interrogatories twice. Why not just wait to hear what you've got to say, and we'll then give our answers.

We want to give them the answers. I told them we'd do it as soon as practical after we got your ruling. But we'll do whatever you tell us to do, Judge.

THE COURT: All but the patient and doctor information, I take it, you're prepared, and the interrogatory answers are ready to go?

MR. DUCK: Yeah, we are. I mean, you know, it's kind of one of those things where what you say in your ruling could materially change even some of those answers, because it relates to expert information.

So a lot of the arguments you heard from Mr. Whitten and me today are part of the substantive responses that we're going to give to Teva in those interrogatories.

So what I'm envisioning is having to rewrite the majority of the interrogatories after we provide these answers, and I'm also envisioning new motion practice getting set up based on our old answers when it could have just been cleared up by getting a ruling from you today and we just answer once.

But that said, if you want us to answer the interrogatories we can answer now, we'll do it. I would like to have a few days to look them over and make sure that we're not doing something we don't want to do.

THE COURT: I think what I would ask is that the ones you can answer, let's go ahead and get those done by, how about Tuesday, 4:00 p.m., the 9th.

MR. DUCK: Okay.

THE COURT: And then just make note of the ones -- I mean, specifically say in your responses that you're reserving these until after my ruling on the claim data.

MR. DUCK: Yes, sir. We'll do it. Thank you.

Does that work for you, Nick?

MR. MERKLEY: That works.

Thank you, your Honor.

THE COURT: Anything else?

MR. WHITTEN: No, your Honor.

THE COURT: All right. Thank you all very much. Very good argument. And if we could, come up here and let's go through these with Angie, and let's get these marked the way she needs to have them marked, and then I'll wait for you all to just let the process take its course that we've created, and call me if I'm needed.

(End of proceedings)

IN THE DISTRICT COURT OF CLEVELAND COUNTY STATE OF OKLAHOMA

STATE OF OKLAHOMA, ex rel., MIKE HUNTER, ATTORNEY GENERAL OF OKLAHOMA, Plaintiff, VS. (1) PURDUE PHARMA L.P.; (2) PURDUE PHARMA, INC.; (3) THE PURDUE FREDERICK COMPANY; (4) TEVA PHARMACEUTICALS USA, INC.; (5) CEPHALON, INC.; (6) JOHNSON & JOHNSON; (7) JANSSEN PHARMACEUTICALS, INC.; (8) ORTHO-McNEIL-JANSSEN Case No. CJ-2017-816 PHARMACEUTICALS, INC., n/k/a JANSSEN PHARMACEUTICALS, INC.; The Honorable Thad Balkman (9) JANSSEN PHARMACEUTICA, INC., n/k/a JANSSEN PHARMACEUTICALS, INC.; (10) ALLERGAN, PLC, f/k/a ACTAVIS PLC, f/k/a ACTAVIS, INC., f/k/a WATSON JURY TRIAL DEMANDED PHARMACEUTICALS, INC.; (11) WATSON LABORATORIES, INC.; (12) ACTAVIS LLC; and (13) ACTAVIS PHARMA, INC., f/k/a WATSON PHARMA, INC., Defendants.

STATE'S RESPONSES AND OBJECTIONS TO DEFENDANT CEPHALON, INC.'S SECOND SET OF INTERROGATORIES

Pursuant to 12 OKLA. STAT. §3233, Plaintiff, the State of Oklahoma (the "State" or "Plaintiff"), hereby submits its Responses and Objections to Defendant Cephalon, Inc.'s ("Defendant") Second Set of Interrogatories to Plaintiff ("Second Interrogatories"). The State specifically reserves the right to supplement, amend and/or revise these Responses and Objections in accordance with 12 OKLA. STAT. §3226.

GENERAL OBJECTIONS

- 1. By responding to Defendant's interrogatories, the State concedes neither the relevance nor admissibility of any information provided or documents or other materials produced in response to such requests. The production of information or documents or other materials in response to any specific interrogatory does not constitute an admission that such information is probative of any particular issue in this case. Such production or response means only that, subject to all conditions and objections set forth herein and following a reasonably diligent investigation of reasonably accessible and non-privileged information, the State believes the information provided is responsive to the request.
- 2. The State objects that much of the requests sought are premature and, as such, provides the responses set forth herein solely based upon information presently known to and within the possession, custody or control of the State. Subsequent discovery, information produced by Defendant or the other named Defendants in this litigation, investigation, expert discovery, third-party discovery, depositions and further analysis may result in additions to, changes or modifications in, and/or variations from the responses and objections set forth herein. Accordingly, the State specifically and expressly reserves the right to supplement, amend and/or revise the responses and objections set forth herein in due course and in accordance with 12 OKLA. STAT. §3226.
- 3. The State objects to the inappropriate manner by which Defendants attempt or may attempt in the future to increase the number of interrogatories to which the State must respond, as Defendants have purported to serve separate interrogatories from subsidiaries and affiliates of related entities. The Oklahoma Code of Civil Procedure states, "[t]he number of interrogatories to a party shall not exceed thirty in number." 12 OKLA. STAT. 3233(A). As such, absent an order

to the contrary or agreement modifying these limitations, each party to this litigation, including the State, is only required to respond to a sum total of 30 interrogatories, regardless of the number of parties purporting to serve such interrogatories. However, to avoid dispute, the State will agree to respond to 30 interrogatories from each Defendant Family—(1) the Purdue Defendants, (2) the Janssen Defendants, and (3) the Teva Defendants—for a total of 90 interrogatories.

- 4. The State further objects that Defendants have exceeded their respective 30interrogatory limit. The Defendants are defending this litigation and conducting discovery pursuant to a joint defense agreement. As such, though Defendants' first interrogatories were divided into six sets from separate named Defendants, these first interrogatories were "joint requests" that sought information related to all Defendants simultaneously and were not limited to the serving Defendant (the "First Interrogatories"). The First Interrogatories consisted of at least 24 Joint Interrogatories, to which the State responded. As such, following the First Interrogatories, each Defendant Family was left with, at most, 6 unused interrogatories. Indeed, the manner in which Defendants purportedly combined separate and distinct subparts into single interrogatories was improper and already far exceeded the presumptive 30-interrogatory limit. By the State's count, Defendants have collectively served 66 Joint Interrogatories when all separate and distinct subparts are properly counted. The State will respond to the first 6 interrogatories served by each Defendant Family since the First Interrogatories, and the State will stand on its objections and decline to answer any additional interrogatories. The State expressly reserves any and all objections to those interrogatories that exceed Defendants' limits which are not answered herein.
- 5. The State further objects to the compound nature of Defendant's Second Interrogatories and will appropriately construe any compound Interrogatories as consisting of separate Interrogatories that count towards the total of 30 interrogatories to which the State has

agreed to respond for each Defendant Family. However, any response to a compound interrogatory herein shall not constitute a waiver of the State's objection to the Interrogatory's compound nature or the State's right to refuse to respond to any interrogatories that exceed the number of interrogatories to which the State must respond under Section 3233(A).

OBJECTIONS TO INSTRUCTIONS

- 1. The State hereby incorporates by this reference its Objections to Defendants First Interrogatories as if fully set forth herein.
- 2. The State objects to Defendant's Instruction Number 1 as vague, ambiguous, overly broad, disproportionate to the needs of the case, seeking to impose a burden on the State that exceeds what is permissible under Oklahoma law, seeking information protected from disclosure by privilege and/or the work product doctrine, and calling for information that is not in the possession, custody or control of and is not reasonably accessible to the State. To the extent the State can and does provide a response to any interrogatory, the State's response is based on the information known to and within the possession, custody and control of the State following a reasonably diligent investigation. The State further objects to Defendant's Instruction Number 1 to the extent that it attempts to require the State to describe or identify sources of information outside the State's possession, custody or control. The State will object and/or respond to each interrogatory in accordance with 12 OKLA. STAT. §3233.
- 3. The State objects to Defendant's Instruction Number 2, which states that Defendant's requests are "continuing," as seeking to impose a burden upon the State that is beyond what is permissible under Oklahoma law. The State will respond to Defendant's interrogatories based on a reasonably diligent investigation of the information currently known to and within the

possession, custody and control of the State, and the State will amend or supplement its responses, if necessary, in accordance with 12 OKLA. STAT. §3226.

- 4. The State objects to Defendant's Instruction Number 3 as ambiguous, vague, unreasonable, overbroad, unduly burdensome and an impermissible attempt to impose a burden upon the State beyond what is allowable under Oklahoma law. To the extent the State withholds otherwise discoverable information on the basis of any claim of privilege or work-product trial preparation material, the State will supply Defendant with the information required under Oklahoma law related to such information at the appropriate time and/or in accordance with the orders of the Court. See 12 OKLA. STAT. §3226(B)(5)(a). To the extent the State withholds any information for any other reasons, the State will comply with its obligations under Oklahoma law.
- 5. The State objects to Defendant's Instruction Number 5 because it seeks to impose a burden on the State beyond those permitted or contemplated under Oklahoma law. The State will respond to Defendant's requests according to how they are written. To the extent Defendant chose to use vague or indecipherable terms, the State will reasonably construe such term based upon their plain and ordinary meaning.
- 6. The State objects to Defendant's Instruction Number 6 because it seeks to impose a burden on the State beyond what is permitted under Oklahoma law. If the State answers an interrogatory by reference to its business records, the State will do so in the manner permitted under 12 OKLA. STAT. §3233(C) and provide the information called for by that statute.

OBJECTIONS TO DEFINITIONS

1. The State objects to Defendant's Definition Number 1 of the term "claim" as vague, overbroad, ambiguous, unduly burdensome, disproportionate to the needs of the case, unreasonable, irrelevant and unworkable. "[A]ny request for payment or reimbursement"

encompasses an unlimited amount of information that has no bearing whatsoever on the parties to this action or the claims or defenses asserted in this action. Based on the claims and defenses at issue in this case, the State will reasonably interpret the term "claim" to mean a request for payment or reimbursement submitted to the Oklahoma Health Care Authority pursuant to Oklahoma's Medicaid Program as related to the claims and defenses at issue in this litigation.

- 2. The State objects to Defendant's Definition Number 3 of the term "communication(s)" as vague, ambiguous, unduly burdensome, disproportionate to the needs of the case, unreasonable, unworkable and seeking to impose a burden upon the State beyond what is permissible under Oklahoma law. Specifically, the State objects to the terms "conduct" and "omissions" in Defendant's purported Definition Number 3. The State will reasonably interpret the term "communication(s)" to mean the transmittal of information between two or more persons, whether spoken or written.
- 3. The State objects to Defendant's Definition Number 7—Defendant's second purported definition of the term "document(s)"—as overly broad, unduly burdensome, disproportionate to the needs of the case, irrelevant and attempting to impose a burden on the State beyond what is permissible under Oklahoma law. The State will not create "instructions" or "other materials" that do not otherwise exist. Nor will the State produce: (i) "file-folder[s], labeled-box[es], or notebook[s]"; and (ii) "ind[ices], table[s] of contents, list[s], or summaries that serve to organize, identify, or reference" a document simply because a responsive document is related to or contained within such information. Pursuant to 12 OKLA. STAT. §§3233-3234, following a reasonably diligent investigation, the State will permit inspection of the reasonably accessible, responsive, non-privileged documents, as that term is defined in 12 OKLA. STAT. §3234(A)(1), within the State's possession, custody or control that the State is reasonably able to locate at a time

and place mutually agreeable to the parties. To the extent a folder, label, container, index, table of contents, list or summary is otherwise responsive to a request and satisfies these conditions, it will be made available for inspection or produced.

- 4. The State objects to Defendant's Definition Number 9 of "Electronically Stored Information" as overly broad, unduly burdensome, disproportionate to the needs of the case, irrelevant to the claims and defenses at issue, and seeking to impose a burden upon the State beyond what is permissible under Oklahoma law. The State will not produce ESI from sources that are not reasonably accessible or over which the State does not have sufficient custody and/or control. The State will produce or permit the inspection of ESI in the manner set forth in the State's Responses and Objections to Defendant's First Set of Requests for Production of Documents to Plaintiff.
- 5. The State objects to Defendant's Definition Number 10 of the term "employee" as overly broad, unduly burdensome, disproportionate to the needs of the case, irrelevant to the claims and defenses at issue, calling for information beyond what is within the State's possession, custody and control, and seeking to impose a burden upon the State beyond what is permissible under Oklahoma law. The State will reasonably construe the term "employee" to mean an individual employed by the State during the inquired-about time period over whom the State maintains sufficient custody and control to enable the State to possess or access responsive records or information pertaining to the individual.
- 6. The State objects to Defendant's Definition Number 11 of the terms "Healthcare Professional(s)," "Health Care Provider(s)" or "HCP(s)." Defendant's proposed definition is overly broad, irrelevant to the claims and defenses at issue, unduly burdensome and disproportionate to the needs of the case in that the definition is not limited in any way to the State

of Oklahoma or any particular time period. The State will reasonably construe the use of these terms to mean healthcare professionals or providers who provided medical or health care services in the State of Oklahoma to citizens—not "animals"—in the State of Oklahoma from January 1, 2007 to the date Defendant's requests were served. The State further incorporates each of its objections to Definition Numbers 13 (the term "Medical Assisted Treatment") and 21 (the term "Relevant Medication") as if fully set forth in this objection to Definition Number 11.

- 7. The State objects to Defendant's Definition Number 13 of the term "Medication Assisted Treatment." Defendant's purported definition is overly broad, unduly burdensome, irrelevant to the claims and defenses in this action, and disproportionate to the needs of this case, because it attempts to encompass treatment related to any "substance abuse disorder[]" and any effort to "prevent Opioid overdose." The State incorporates its objections to Defendant's Definition Number 16 of the term "Opioid(s)" as if fully set forth in this objection to Definition Number 13. The State will reasonably construe the term "Medication Assisted Treatment" to mean substance abuse treatment related to the claims and defenses at issue in this litigation.
- 8. The State objects to Defendant's Definition Number 15 of the terms "Oklahoma Agency" or "Oklahoma Agencies" as overly broad, unduly burdensome, irrelevant to the claims and defenses in this action, disproportionate to the needs of the case, and improperly calling for information that is not in the possession, custody or control of the State. The State will reasonably construe the terms "Oklahoma Agency" or "Oklahoma Agencies" to mean agencies of the State of Oklahoma reasonably calculated to have information or materials relevant to the claims or defenses asserted in this litigation.
- 9. The State objects to Defendant's Definition Number 16 of the term "Opioid(s)" as misleading because of its use of the terms "FDA-approved" and "pain-reducing" and because it is

defined without regard to any of the pharmaceutical products or drugs at issue in this case. The State will reasonably construe the terms "Opioid(s)" to mean the opioid medications or drugs related to the claims and defenses at issue in this litigation.

- 10. The State objects to Defendant's Definition Number 17 of the term "Patient(s)." This definition—"any human being to whom an Opioid is prescribed or dispensed"—is overly broad, unduly burdensome, irrelevant to the claims and defenses at issue in this action and disproportionate to the needs of the case on its face because it lacks any geographical or temporal limitation that has any bearing on this case, and could be construed to seek information outside the State's possession, custody, or control. The State will reasonably construe the term "patient" to mean an individual who was prescribed an Opioid in the State of Oklahoma from January 1, 2007 through the date these requests were served.
- 11. The State objects to Defendant's Definition Number 19 of the term "Program" and incorporates its objections to Definition Numbers 15 ("Oklahoma Agency") and 16 ("Opioids") as if fully set forth herein. Defendant's purported definition of "Program" is similarly overly broad, irrelevant to the claims and defenses at issue in this action, unduly burdensome and disproportionate to the needs of the case, because it includes no temporal limitations and is entirely untethered to the issues involved in this litigation. The State will reasonably construe the term "Program" to mean a program administered by the State of Oklahoma that reviews, authorizes, and/or determines the conditions for payment or reimbursement for the opioid medications or drugs and related treatment relevant to the claims and defenses at issue in this litigation and over which the State possesses control.
- 12. The State objects to Defendant's Definition Number 21 of the term "Relevant Medication(s)" as misleading to the extent it suggests each listed drug is relevant to the claims or

defenses at issue in this action. Therefore, the State will reasonably construe the term "Relevant Medication(s)" to mean opioid medications or drugs related to the claims and defenses at issue in this litigation.

- 13. The State objects to Defendant's Definition Number 22 of the term "Vendor" as overly broad, unduly burdensome, disproportionate to the needs of the case, seeking to impose a burden upon the State that exceeds what is permitted under Oklahoma law, and calling for information that is not within the State's possession, custody or control. The State further incorporates its objections to and reasonable constructions of the terms defined in Definition Numbers 11 ("HCP") and 19 ("Program") as if fully set forth herein.
- 14. The State objects to Defendant's Definition Number 24 of the terms "You," "Your," "State," "Oklahoma," and "Plaintiff" as overly broad, unduly burdensome, disproportionate to the needs of the case, seeking to impose a burden upon the State that exceeds what is permitted under Oklahoma law, and calling for information that is not within the State's possession, custody or control. The State will respond on behalf of the Office of the Attorney General and those State agencies reasonably calculated to have information or materials relevant to the claims or defenses asserted in this litigation.

RESPONSES AND OBJECTIONS TO INTERROGATORIES

INTERROGATORY NO. 1: For the 245 prescriptions identified in paragraph 37 and Exhibit 3 of the Petition, identify which of those prescriptions were "unnecessary" or "excessive" as alleged in paragraph 34 of the Petition, including, but not limited to, the date of the prescription, the amount of the prescription, the cost of the prescription, and the amount of that cost paid for or reimbursed by You.

RESPONSE TO INTERROGATORY NO. 1:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definition of the term "You," as if fully set forth herein.

The State further objects to this Interrogatory because it attempts to force the State to marshal all of its evidence, including expert evidence, prior to the deadlines set forth in the Court's scheduling Order. See 12 OKLA. STAT. §3233(B). Moreover, because this Interrogatory implicates the content and subject matter of potentially relevant documents and materials that the State is reasonably collecting, searching for, reviewing, and producing, the State will supplement and/or amend its response to this Interrogatory in accordance with 12 OKLA. STAT. §3226 and 12 OKLA. STAT. §3233(C). Further, the State will produce and disclose expert information called for by this Interrogatory in accordance with the scheduling Order entered by the Court.

The State further objects to this interrogatory as impermissibly compound because it indiscriminately groups numerous questions under the guise of a single interrogatory. In reality, this Interrogatory is actually at least five (5) separate interrogatories improperly disguised as one. See 12 OKLA. STAT. §3233(A).

Finally, the State objects to this Interrogatory to the extent it assumes that: (a) Defendant is liable solely for the prescriptions identified in paragraph 37 and Exhibit 3 of the Petition; and (b) Defendant's liability is limited to a per prescription basis as opposed to unnecessary or excessive MMEs and/or pills.

Subject to and without waiving the foregoing objections (including those incorporated into this response), the State responds as follows:

See The State's Response to Janssen Pharmaceuticals Inc.'s Interrogatory No. 1. At this time and based on the information reviewed to date, and subject to ongoing discovery and expert disclosures, the State's position is that it is more likely than not that (1) opioid prescriptions written in the State of Oklahoma since 1996 and reimbursed by SoonerCare, other than those written for end-of-life palliative care or for a three-day supply to treat acute pain, were "unnecessary," "excessive," and/or "false, fraudulent, or otherwise reimbursed in violation of the Oklahoma Medicaid False Claims Act," and (2) opioids prescriptions written in the State of Oklahoma since 1996 and reimbursed by SoonerCare for end-of-life palliative care or for a three-day supply to treat acute pain were not "unnecessary," "excessive," and/or "false, fraudulent, or otherwise reimbursed in violation of the Oklahoma Medicaid False Claims Act."

The State refers Defendant to OHCA-00000001 – OHCA-00000002, produced on May 8, 2018, which constitute the Oklahoma Medicaid claims data for all opioid prescriptions for the years 1996–2017. These databases (which are identical in content but were produced in two different formats for Defendants' convenience) can be queried and sorted by Defendants for use in this litigation and to identify those prescriptions responsive to this request. Additional databases and information the State intends to produce contain substantial identifying information; therefore, the State will produce these databases after the Court has ruled on Defendants' Motion to Compel patient and physician identities.

The State will provide additional information, from which answers to this interrogatory can be determined, in the form of expert opinion(s) and in accordance with the expert disclosure deadlines set out in the Court's scheduling order. Without waiving any objections or rights related to the timing of expert disclosures, the State's expert(s) will opine as to the medical necessity of opioid prescription—both branded and generic—covered by SoonerCare through a statistical

analysis. The Court has not required the State to provide Defendants with this information earlier than as provided in the scheduling order, as was made clear at the August 31, 2018 hearing:

MR. WHITTEN: ... You're not compelling us to turn over our expert witness statistical sample early or in response to this interrogatory?

THE COURT: Not at all.

MR. WHITTEN: Because we cannot.

THE COURT: Of course not, and not at all. No. This goes just to these -- I mean, this was specific as just to this Request 1 through 6, you know, today. But it has nothing to do with the expert model. I understand that. And I understand the distinction in terms of what you expect to present at trial.

August 31, 2018 Hearing Transcript at 73:15-25.

Further, the State's position is that Cephalon is jointly and severally liable not only for any medically unnecessary prescriptions of Cephalon branded drugs, but for *all* medically unnecessary opioids—both branded and generic—reimbursed by the State, which prescriptions were a result of Cephalon's role in a conspiracy involving both branded and unbranded marketing efforts related to opioids. But for Defendants' aggressive marketing campaign—which included not only traditional and direct forms of marketing, but also indirect marketing and biased "education" through third-party Front Groups and KOLs—the State of Oklahoma would not have been inundated with Defendants' harmful opioids and SoonerCare would not have paid for unnecessary opioid prescriptions. In short, Cephalon's liability in this action for causing the present public nuisance, for committing violations of the Oklahoma Medicaid False Claims Act, and for the State's other causes of actions, is not limited to the 245 Cephalon-branded prescriptions covered by SoonerCare. Nor is that what the Petition alleges. Along with the other Defendants, Cephalon is jointly and severally liable (under the causes of action pled) for causing and contributing to the opioid addiction epidemic in Oklahoma. The State intends to use expert opinion(s) to establish

certain elements of its case, including much of the information sought in this Interrogatory. The State has answered this Interrogatory to the extent possible without disclosing expert information and opinions prior to the expert disclosure deadlines. *See* August 31, 2018 Hearing Transcript at 84:16-19.

INTERROGATORY NO. 2: For each prescription You identified as "unnecessary or excessive" in response to Interrogatory No. 1, describe your basis for alleging that it was "unnecessary or excessive."

RESPONSE TO INTERROGATORY NO. 2:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definition of the term "You," as if fully set forth herein.

The State further objects to this Interrogatory because it is a premature contention interrogatory that attempts to force the State to marshal all of its evidence, including expert evidence, before required or appropriate under the Oklahoma Code of Civil Procedure and/or the Court's scheduling Order. *See* 12 OKLA. STAT. §3233(B). The State will respond based on the information currently known to and within the possession, custody and control of the State following a reasonably diligent investigation and will supplement and/or amend its response in due course according to 12 OKLA. STAT. §3226. The State will produce and disclose expert information in accordance with the scheduling Order entered by the Court.

The State further objects to this interrogatory to the extent it attempts to suggest or assume the elements of any of the State's causes of action or otherwise seeks to impose any burden(s) or element(s) of proof that do not exist under or that are inconsistent with Oklahoma law.

Subject to and without waiving the foregoing objections (including those incorporated into this response), the State responds as follows:

See The State's Response to Janssen Pharmaceuticals Inc.'s Interrogatory No. 1. At this time and based on the information reviewed to date, and subject to ongoing discovery and expert disclosures, the State's position is that it is more likely than not that (1) opioid prescriptions written in the State of Oklahoma since 1996 and reimbursed by SoonerCare, other than those written for end-of-life palliative care or for a three-day supply to treat acute pain, were "unnecessary," "excessive," and/or "false, fraudulent, or otherwise reimbursed in violation of the Oklahoma Medicaid False Claims Act," and (2) opioids prescriptions written in the State of Oklahoma since 1996 and reimbursed by SoonerCare for end-of-life palliative care or for a three-day supply to treat acute pain were not "unnecessary," "excessive," and/or "false, fraudulent, or otherwise reimbursed in violation of the Oklahoma Medicaid False Claims Act." The State will continue to supplement this response as expert review continues for these claims.

The State refers Defendant to OHCA-00000001 – OHCA-00000002, produced on May 8, 2018, which constitute the Oklahoma Medicaid claims data for all opioid prescriptions for the years 1996–2017. These databases (which are identical in content but were produced in two different formats for Defendants' convenience) can be queried and sorted by Defendants for use in this litigation and to identify those prescriptions responsive to this request.

The State's principal methods and criteria for determining whether medical treatment is medically necessary and, thus, whether a claim is reimbursable by SoonerCare are set forth in the Oklahoma Administrative Code and require the consideration of the following standards:

(1) Services must be medical in nature and must be consistent with accepted health care practice standards and guidelines for the prevention, diagnosis or treatment of symptoms of illness, disease or disability;

- (2) Documentation submitted in order to request services or substantiate previously provided services must demonstrate through adequate objective medical records, evidence sufficient to justify the client's need for the service;
- (3) Treatment of the client's condition, disease or injury must be based on reasonable and predictable health outcomes;
- (4) Services must be necessary to alleviate a medical condition and must be required for reasons other than convenience for the client, family, or medical provider;
- (5) Services must be delivered in the most cost-effective manner and most appropriate setting; and
- (6) Services must be appropriate for the client's age and health status and developed for the client to achieve, maintain or promote functional capacity.

OKLA. ADMIN. CODE §317:30-3-1(f). However, when parties engage in and conspire to engage in a widespread misinformation campaign, such as Defendants did here, such conduct corrupts the informed consideration of these criteria and, thus, the certification of these determinations.

The State notes that Defendants have pled the learned intermediary doctrine in an attempt to blame physicians for the fallout of the opioid epidemic. The State disagrees that such a defense is legally or factually applicable to this case. In Oklahoma, the learned intermediary defense is only available in products liability cases. See McKee v. Moore, 1982 OK 71, ¶6-8, 648 P.2d 21; Brown v. Am. Home Prods. Corp., No. 1203, 2009 U.S. Dist. LEXIS 30298, at *24 (E.D. Pa. Apr. 2, 2009). This case is not a products liability case. Therefore, the learned intermediary doctrine is not applicable. Moreover, even if it were applicable, the doctrine only shields manufacturers of prescription drugs from liability "if the manufacturer adequately warns the prescribing physicians of the dangers of the drug." Edwards, 1997 OK 22, ¶8. "To invoke a defense to liability under the learned intermediary doctrine, a manufacturer seeking its protection must provide sufficient information to the learned intermediary of the risk subsequently shown to be the proximate cause of a plaintiff's injury." Tortorelli v. Mercy Health Ctr., Inc., 2010 OK CIV APP 105, ¶27, 242 P.3d 549. Here, Defendants intentionally misrepresented the risks of opioid addiction—often contradicting their own labeling—in a sprawling and coordinated marketing campaign targeting

doctors and others throughout Oklahoma and the country. Defendants initiated a scheme to change the way physicians think about opioids. Defendants cannot falsely market their drugs to physicians and, at the same time, claim physicians should have known better. As such, even if the learned intermediary doctrine were applicable here (which it is not), Defendants cannot take advantage of the doctrine because they failed to adequately warn of the true risks of opioids, which risks caused the opioid epidemic in Oklahoma.

Other information related to the State's consideration of the medical necessity of opioid-related treatments, includes, but is not limited to, information which is incorporated herein by reference, as identified by citation or reference in: (i) the State's Original Petition, filed on June 30, 2017; (ii) The State's Omnibus Response to Defendants' Motions to Dismiss, filed on October 30, 2017; and (iii) the State's Responses to Defendants' First Interrogatories, specifically Cephalon Interrogatory Nos. 1-2, and Purdue Pharma Interrogatory No. 4.

In addition, the State refers Defendant to OHCA-00000001 – OHCA-00000002, which were produced on May 8, 2018 and constitute Oklahoma Medicaid claims data for all opioid prescriptions for the years 1996–2017. Additional databases and information the State intends to produce contain substantial identifying information; therefore, the State will produce these databases after the Court has ruled on Defendants' Motion to Compel patient and physician identities.

The State will supplement its Response to this Interrogatory as additional documents, information, reports, studies and research is gathered, reviewed and produced as a part of the State's ongoing investigation and reasonably diligent search for information responsive to Defendants' Interrogatories and Requests for Production of Documents.

See also the State's Objections and Response to Interrogatory No. 1 above. Without waiving any objections or rights related to the timing of expert disclosures, and in accordance with the Court's scheduling order, the State intends to provide Defendants with expert opinion(s) from which answers to this Interrogatory can be determined. Specifically, subject to the objections above, the State's expert(s) will opine as to the opioid prescription that are/were medically unnecessary and will describe the parameters used to make those determinations. The State has answered this Interrogatory to the extent possible without disclosing expert information and opinions prior to the expert disclosure deadlines. See August 31, 2018 Hearing Transcript at 84:16-19.

INTERROGATORY NO. 3: For each prescription You identified as "unnecessary or excessive" in response to Interrogatory No. 1, identify the name and address of the HCP who issued the prescription, the name and address of the patient to whom the prescription was issued, the diagnosis of the patient receiving the prescription, and the name of the Oklahoma Agency employee(s) who approved Your payment or reimbursement of each such prescription.

RESPONSE TO INTERROGATORY NO. 3:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definitions of the terms "HCP," "Oklahoma Agency," "You," and "Your," as if fully set forth herein.

The State further objects to this interrogatory as overbroad, unduly burdensome, disproportionate to the needs of the case, calling for information that is not within the State's possession, custody or control, and seeking information that is irrelevant to the claims and defenses at issue in this case. The Interrogatory is overbroad and unreasonable on its face because it seeks addresses of individuals, both healthcare providers and patients, that are not readily accessible to

the State. To the extent the State is in possession of current names and addresses of healthcare providers and patients that have participated in the SoonerCare program, despite the number of years spanned by the pharmacy claims at issue, such names and addresses must be cross-referenced through several data sets or information repositories. Many such names and addresses would likely be stale. Further, the names and addresses of healthcare providers and patients are irrelevant to the claims and defenses in this action and/or any minimal relevance of this information is substantially outweighed by the burden of providing it, especially if Defendant's request is interpreted as requesting *current* names and addresses, which change over time.

The State further objects to this Interrogatory as seeking information within Defendant's possession, custody or control. Specifically, Defendant monitors and tracks healthcare providers' prescribing practices and is aware of the providers who prescribe their medications. Indeed, Defendant utilizes such information to strategically determine which doctors to attack with its sales force and what sales tactics to deploy.

The State further objects to this interrogatory to the extent it attempts to suggest or assume the elements of any of the State's causes of action or otherwise seeks to impose any burden(s) or element(s) of proof that do not exist under or that are inconsistent with Oklahoma law.

The State objects to this interrogatory as seeking confidential and sensitive information protected from disclosure under both State and federal statutes, rules, regulations. Specifically, the State objects to this Interrogatory as seeking protected health information prohibited from disclosure under the Health Insurance Portability and Accountability Act ("HIPAA"), 42 C.F.R. Part 2, and other State and federal statutes, rules, and regulations.

Subject to and without waiving the foregoing objections (including those incorporated into this response), the State responds as follows:

The State refers Defendant to OHCA-00000001 – OHCA-00000002, which were produced on May 8, 2018 and constitute de-identified Oklahoma Medicaid claims data for all opioid prescriptions for the years 1996–2017. The State will produce non-privileged, responsive and relevant business records from which the answer to this interrogatory or parts of this interrogatory may be derived or ascertained, and the burden of deriving or ascertaining the answer is substantially the same for Defendant as it is for the State. Additional databases and information the State intends to produce contain substantial identifying information; therefore, the State will produce these databases after the Court has ruled on Defendants' Motion to Compel patient and physician identities.

See also the State's Objections and Responses to Interrogatories Nos. 1 and 2 above. The State cannot further answer or supplement this Interrogatory until the Court has ruled on Defendants' Motion to Compel patient and physician identities.

INTERROGATORY NO. 4: For each HCP You identified in response to Interrogatory No. 3, identify each misrepresentation to that HCP that caused the HCP to prescribe an "unnecessary or excessive" prescription You identified in response to Interrogatory No. 1, including the date the HCP received that misrepresentation and the means by which that misrepresentation was communicated to that HCP.

RESPONSE TO INTERROGATORY NO. 4:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definitions of the terms "HCP" and "You," as if fully set forth herein.

The State further objects to this Interrogatory because it is a premature contention interrogatory that attempts to force the State to marshal all of its evidence, including expert

evidence, before required or appropriate under the Oklahoma Code of Civil Procedure or the Court's scheduling Order. *See* 12 OKLA. STAT. §3233(B). Because this Interrogatory seeks the identity of documents and materials while the State may be reasonably collecting, searching, reviewing, and producing, the State will supplement and/or amend its response to this Interrogatory in accordance with 12 OKLA. STAT. §3226 and 12 OKLA. STAT. §3233(C). Further, the State will produce and disclose expert information in accordance with the scheduling Order entered by the Court.

The State further objects to this interrogatory as overbroad, unduly burdensome, vague, ambiguous, disproportionate to the needs of the case, calling for information that is not within the State's possession, custody or control, and seeking information that is irrelevant to the claims and defenses at issue in this case. The request to identify each and every misrepresentation made by Defendants related to both branded opioids and opioids generally—all of which misrepresentations were intended to change the way healthcare providers thought about opioids and to encourage over-prescribing of opioids—for a period of over two decades is overbroad and unduly burdensome on its face. Further, the State is not required in this litigation to identify each and every misrepresentation made by defendants or to tie specific misrepresentations to each false or fraudulent claim reimbursed by the State. The State will prove its claims as required by Oklahoma law and in accordance with the applicable rules of evidence.

The State further objects to this Interrogatory as seeking information within Defendant's possession, custody or control. Specifically, Defendant monitors and tracks healthcare providers' prescribing practices and is aware of the providers who prescribe their medications. Indeed, Defendant utilizes such information to strategically determine which doctors to attack with its sales force and what sales tactics to deploy.

The State further objects to this interrogatory to the extent it attempts to suggest or assume the elements of any of the State's causes of action or otherwise seeks to impose any burden(s) or element(s) of proof that do not exist under or that are inconsistent with Oklahoma law. Specifically, the State objects to this interrogatory to the extent it suggests or assumes Defendant must have made a misrepresentation directly to an Oklahoma healthcare provider to be liable for the State's claims under the Oklahoma Medicaid False Claims Act.

Subject to and without waiving the foregoing objections (including those incorporated into this response), the State responds as follows:

See Objections and Response to Interrogatory Nos. 1-4 above. The State will produce non-privileged, responsive and relevant business records from which the answer to this interrogatory or parts of this interrogatory may be derived or ascertained, and the burden of deriving or ascertaining the answer is substantially the same for Defendant as it is for the State. Additional databases and information the State intends to produce contain substantial identifying information; therefore, the State will produce these databases after the Court has ruled on Defendants' Motion to Compel patient and physician identities.

Further, the State is not required to answer this Interrogatory as posed because it seeks information not relevant to the case and mischaracterizes the elements of the State's causes of action and the nature of the State's burden of proof. In the same vein, the requested information is not relevant to Defendants' defenses, or any small amount of relevance is far outweighed by the burden to the State. Indeed, the State simply is not required to show individual misrepresentations or false statements that directly and independently caused a particular unnecessary prescription of a Cephalon opioid to be written by a physician, filled by a pharmacy, and/or covered by SoonerCare. The fact that Cephalon wishes this were the case does not change the scope of

permissible discovery. The State intends to prove the causes of action it has alleged in accordance with the applicable law. The State expects Defendants only defend themselves against the allegations and claims the State has actually asserted.

Without waiving any objections or rights related to the timing of expert disclosures, the State further states that it intends prove parts of its case through the statistical analyses and the use of a statistically valid sample of SoonerCare claims, the particulars of which will be provided to Defendants in accordance with the Court's scheduling order. The State has answered this Interrogatory to the extent possible without disclosing expert information and opinions prior to the expert disclosure deadlines. *See* August 31, 2018 Hearing Transcript at 84:16-19.

INTERROGATORY NO. 5: For each Oklahoma Agency You identified in response to Interrogatory No. 3, identify each misrepresentation that caused that employee to approve the payment for or reimbursement of each "unnecessary or excessive" prescription You identified in response to Interrogatory No. 1, including the date the employee received that misrepresentation and the means by which that misrepresentation was communicated to that employee.

RESPONSE TO INTERROGATORY NO. 5:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definitions of the terms "HCP" and "You," as if fully set forth herein.

See Objections and Response to Interrogatory No. 4 above, which are hereby incorporated by this reference as if fully set forth herein. The State further objects to this interrogatory to the extent it attempts to suggest or assume the elements of any of the State's causes of action or otherwise seeks to impose any burden(s) or element(s) of proof that do not exist under or that are

inconsistent with Oklahoma law. Specifically, the State objects to this interrogatory to the extent it suggests or assumes Defendant must have made a misrepresentation directly to an Oklahoma healthcare provider to be liable for the State's claims under the Oklahoma Medicaid False Claims Act.

Subject to and without waiving the foregoing objections (including those incorporated into this response), the State responds as follows:

See Objections and Responses to Interrogatories Nos. 1-4 above. The State will produce non-privileged, responsive and relevant business records from which the answer to this interrogatory or parts of this interrogatory may be derived or ascertained, and the burden of deriving or ascertaining the answer is substantially the same for Defendant as it is for the State. Additional databases and information the State intends to produce contain substantial identifying information; therefore, the State will produce these databases after the Court has ruled on Defendants' Motion to Compel patient and physician identities.

Further, the State is not required to answer this Interrogatory as posed because it seeks information not relevant to the case and mischaracterizes the elements of the State's causes of action and the nature of the State's burden of proof. In the same vein, the requested information is not relevant to Defendants' defenses, or any small amount of relevance is far outweighed by the burden to the State. Indeed, the State simply is not required to show individual misrepresentations or false statements that directly and independently caused an unnecessary prescription of a Cephalon opioid to be written by a physician, filled by a pharmacy, and/or covered by SoonerCare. The fact that Cephalon wishes this were the case does not change the scope of permissible discovery. The State intends to prove the causes of action it has alleged in accordance with the

applicable law. The State expect Defendants only defend themselves against the allegations and claims the State has actually asserted.

Without waiving any objections or rights related to the timing of expert disclosures, the State further states that it intends prove its case (or parts of its case) through the statistical analyses and the use of a statistically valid sample of SoonerCare claims, the particulars of which will be provided to Defendants in accordance with the Court's scheduling order. The State has answered this Interrogatory to the extent possible without disclosing expert information and opinions prior to the expert disclosure deadlines. *See* August 31, 2018 Hearing Transcript at 84:16-19.

INTERROGATORY NO. 6: Identify each instance in which you and any other entity that provides or administers benefits for Your Programs denied payment or reimbursement for a prescription of Actiq or Fentora as "unnecessary or excessive," and describe the details of the denial, including the date, claim number, the identify the name and address of the HCP, identify the name and address of the patient, the reason(s) given for the denial, and associated records or other documentation.

RESPONSE TO INTERROGATORY NO. 6:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definitions of the terms "HCP" and "Your," "Program," and "HCP," as if fully set forth herein.

The State further objects to this Interrogatory because it is unclear and confusing in its wording, though the State will reasonably attempt to construe its intended meaning. Further, the Interrogatory is a premature contention interrogatory that seeks to force the State to marshal all of its evidence, including expert evidence, before required or appropriate under the Rules of the Court's scheduling Order. *See* 12 OKLA. STAT. §3233(B). To the extent the State can respond to

this Interrogatory at this stage, the State will do so based on the information currently known to and within the possession, custody and control of the State following a reasonably diligent investigation and will supplement and/or amend its response in due course according to 12 OKLA. STAT. §3226. Further, the State will produce-and disclose expert information in accordance with the scheduling Order entered by the Court.

The State further objects to this interrogatory as overbroad, unduly burdensome, vague, ambiguous, disproportionate to the needs of the case, calling for information that is not within the State's possession, custody or control, and seeking information that is irrelevant to the claims and defenses at issue in this case. The Interrogatory is overbroad and unreasonable on its face because it seeks addresses of individuals, both healthcare providers and patients, that are not readily accessible to the State, and because it seeks identification of "each instance" a claim was denied. To the extent the State is in possession of current names and addresses of healthcare providers and patients that have participated in the SoonerCare program, despite the number of years spanned by the pharmacy claims at issue, such names and addresses must be cross-referenced through several data sets or information repositories. Many such names and addresses would likely be stale. Further, the names and addresses of healthcare providers and patients are irrelevant to the claims and defenses in this action and/or any minimal relevance of this information is substantially outweighed by the burden of providing it, especially if Defendant's request is interpreted as requesting *current* names and addresses, which change over time.

The State further objects to this Interrogatory as seeking information within Defendant's possession, custody or control. Specifically, Defendant monitors and tracks healthcare providers' prescribing practices and is aware of the providers who prescribe their medications. Indeed,

Defendant utilizes such information to strategically determine which doctors to attack with its sales force and what sales tactics to deploy.

The State further objects to this Interrogatory as seeking protected health information prohibited from disclosure under the Health Insurance Portability and Accountability Act ("HIPAA"). The State has provided Defendants with an acceptable version of a protective order covering HIPAA-protected documents and information. The State will not produce or otherwise disclose any protected health information until that protective order, or a substantially similar protective order, is agreed to by Defendants and entered by the Court.

Subject to and without waiving the foregoing objections (including those incorporated into this response), the State responds as follows:

See Objections and Response to Interrogatories Nos. 1-5 above, which are hereby incorporated by this reference as if fully set forth herein. The State will produce non-privileged, responsive and relevant business records from which the answer to this interrogatory or parts of this interrogatory may be derived or ascertained, and the burden of deriving or ascertaining the answer is substantially the same for Defendant as it is for the State. Additional databases and information the State intends to produce contain substantial identifying information; therefore, the State will produce these databases after the Court has ruled on Defendants' Motion to Compel patient and physician identities.

Having incorporated the above Objections and Responses to Interrogatories Nos. 1-5, the State has answered this Interrogatory to the extent possible without disclosing expert information and opinions prior to the expert disclosure deadlines. *See* August 31, 2018 Hearing Transcript at 84:16-19.

INTERROGATORY NO. 7: Identify the prescriptions of Actiq or Fentora that were issued to Oklahoma patients as a result of Cephalon's sales force misrepresenting "Actiq and Fentor as being appropriate for non-cancer pain and non-opioid-tolerant individuals, despite their labels' contrary warnings," as alleged in paragraph 53 of the Petition, including the date of each prescription, the identity of the HCP who wrote the prescription, the misrepresentation and/or omission by Cephalon that caused that HCP to write the prescription, the name and address of the patient who received the prescription, the diagnosis of the patient receiving the prescription, the amount of the prescription, and any harm to the patient that allegedly resulted from the prescription.

RESPONSE TO INTERROGATORY NO. 7:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definitions of the terms "HCP," "Patient," and "Opioid," as if fully set forth herein.

The State further objects to this interrogatory as overbroad, unduly burdensome, disproportionate to the needs of the case, calling for information that is not within the State's possession, custody or control, and seeking information that is irrelevant to the claims and defenses at issue in this case. The Interrogatory purportedly seeks information outside of the State's possessions, custody or control for patients not subject to SoonerCare. To the extent the State is in possession of current names and addresses of healthcare providers and patients that have participated in the SoonerCare program, despite the number of years spanned by the pharmacy claims at issue, such names and addresses must be cross-referenced through several data sets or information repositories. Many such names and addresses would likely be stale. Further, the names and addresses of healthcare providers and patients are irrelevant to the claims and defenses

in this action and/or any minimal relevance of this information is substantially outweighed by the burden of providing it, especially if Defendant's request is interpreted as requesting *current* names and addresses, which change over time.

The State further objects to this Interrogatory as seeking information within Defendant's possession, custody or control. Specifically, Defendant monitors and tracks healthcare providers' prescribing practices and is aware of the providers who prescribe their medications. Indeed, Defendant utilizes such information to strategically determine which doctors to attack with its sales force and what sales tactics to deploy.

The State further objects to this interrogatory to the extent it attempts to suggest or assume the elements of any of the State's causes of action or otherwise seeks to impose any burden(s) or element(s) of proof that do not exist under or that are inconsistent with Oklahoma law. The State further objects to this Interrogatory to the extent that it assumes the State must prove "harm to the Patient that allegedly resulted from the prescription" for any particular prescription or patient at issue in the case.

The State further objects to this interrogatory as seeking confidential and sensitive information protected from disclosure under both State and federal statutes, rules, regulations. Further, the State objects to this Interrogatory as seeking protected health information prohibited from disclosure under the Health Insurance Portability and Accountability Act ("HIPAA"), 42 C.F.R. Part 2, and other State and federal statutes, rules, and regulations.

The State further objects to this Interrogatory because it is a premature contention interrogatory that seeks to force the State to marshal all of its evidence, including expert evidence, before required or appropriate under the Rules of the Court's scheduling Order. See 12 OKLA.

STAT. §3233(B). Further, the State will produce and disclose expert information in accordance with the scheduling Order entered by the Court.

The State further objects to this interrogatory as impermissibly compound because it indiscriminately groups numerous separate topics, subjects, questions and tasks under the guise of a single interrogatory. In reality, this Interrogatory is actually at least four (4) separate interrogatories improperly disguised as one. See 12 OKLA. STAT. §3233(A).

Finally, the State objects to this interrogatory as it exceeds to presumptive limit on interrogatories, which is 30, without leave of Court. Defendants are defending this litigation and conducting discovery pursuant to a joint defense agreement. As such, though Defendants' first interrogatories were divided into six sets from separate named Defendants, these first interrogatories were "joint requests" that sought information related to all Defendants simultaneously and were not limited to the serving Defendant (the "First Interrogatories"). The First Interrogatories consisted of at least 24 Joint Interrogatories, to which the State responded. As such, following the First Interrogatories, each Defendant Family was left with, at most, 6 unused interrogatories. Indeed, the manner in which Defendants purportedly combined separate and distinct subparts into single interrogatories was improper and already far exceeded the presumptive 30-interrogatory limit. By the State's count, Defendants have collectively served 66 Joint Interrogatories when all separate and distinct subparts are properly counted. Nevertheless, the State has already responded to 6 additional interrogatories by each Defendant family.

Interrogatory No. 8: Describe in detail Cephalon's "other marketing" misrepresenting "Actiq and Fentor as being appropriate for non-cancer pain and non-opioid-tolerant individuals, despite their labels' contrary warnings," as alleged in paragraph 53 of the Petition, including the date of each prescription, the identity of the HCP who wrote the

prescription, the misrepresentation and/or omission by Cephalon that caused that HCP to write the prescription, the name and address of the patient who received the prescription, the diagnosis of the patient receiving the prescription, the amount of the prescription, and any harm to the patient that allegedly resulted from the prescription.

RESPONSE TO INTERROGATORY NO. 8:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definitions of the terms "HCP," "Patient," and "Opioid," as if fully set forth herein.

The State further objects to this interrogatory as overbroad, unduly burdensome, disproportionate to the needs of the case, calling for information that is not within the State's possession, custody or control, and seeking information that is irrelevant to the claims and defenses at issue in this case. The Interrogatory purportedly seeks information outside of the State's possessions, custody or control for patients not subject to SoonerCare. To the extent the State is in possession of current names and addresses of healthcare providers and patients that have participated in the SoonerCare program, despite the number of years spanned by the pharmacy claims at issue, such names and addresses must be cross-referenced through several data sets or information repositories. Many such names and addresses would likely be stale. Further, the names and addresses of healthcare providers and patients are irrelevant to the claims and defenses in this action and/or any minimal relevance of this information is substantially outweighed by the burden of providing it, especially if Defendant's request is interpreted as requesting *current* names and addresses, which change over time.

The State further objects to this Interrogatory as seeking information within Defendant's possession, custody or control. Specifically, Defendant monitors and tracks healthcare providers'

prescribing practices and is aware of the providers who prescribe their medications. Indeed, Defendant utilizes such information to strategically determine which doctors to attack with its sales force and what sales tactics to deploy.

The State further objects to this interrogatory to the extent it attempts to suggest or assume the elements of any of the State's causes of action or otherwise seeks to impose any burden(s) or element(s) of proof that do not exist under or that are inconsistent with Oklahoma law. The State further objects to this Interrogatory to the extent that it assumes the State must prove "harm to the Patient that allegedly resulted from the prescription" for any particular prescription or patient at issue in the case.

The State further objects to this interrogatory as seeking confidential and sensitive information protected from disclosure under both State and federal statutes, rules, regulations. Further, the State objects to this Interrogatory as seeking protected health information prohibited from disclosure under the Health Insurance Portability and Accountability Act ("HIPAA"), 42 C.F.R. Part 2, and other State and federal statutes, rules, and regulations.

The State further objects to this Interrogatory because it is a premature contention interrogatory that seeks to force the State to marshal all of its evidence, including expert evidence, before required or appropriate under the Rules of the Court's scheduling Order. *See* 12 OKLA. STAT. §3233(B). Further, the State will produce and disclose expert information in accordance with the scheduling Order entered by the Court.

The State further objects to this interrogatory as impermissibly compound because it indiscriminately groups numerous separate topics, subjects, questions and tasks under the guise of a single interrogatory. In reality, this Interrogatory is actually at least four (4) separate interrogatories improperly disguised as one. See 12 OKLA. STAT. §3233(A).

Finally, the State objects to this interrogatory as it exceeds to presumptive limit on interrogatories, which is 30, without leave of Court. Defendants are defending this litigation and conducting discovery pursuant to a joint defense agreement. As such, though Defendants' first interrogatories were divided into six sets from separate named Defendants, these first interrogatories were "joint requests" that sought information related to all Defendants simultaneously and were not limited to the serving Defendant (the "First Interrogatories"). The First Interrogatories consisted of at least 24 Joint Interrogatories, to which the State responded. As such, following the First Interrogatories, each Defendant Family was left with, at most, 6 unused interrogatories. Indeed, the manner in which Defendants purportedly combined separate and distinct subparts into single interrogatories was improper and already far exceeded the presumptive 30-interrogatory limit. By the State's count, Defendants have collectively served 66 Joint Interrogatories when all separate and distinct subparts are properly counted. Nevertheless, the State has already responded to 6 additional interrogatories by each Defendant family.

INTERROGATORY NO. 9: Identify all opioid prescriptions that you contend were caused to be written as a result of the 2007 "APF treatment guide" alleged in paragraph 64 of the Petition, and for each such prescription identify the HCP who wrote the prescription, the name and address of the patient who received the prescription, the diagnosis of the patient receiving the prescription, the amount of the prescription, and any harm to the patient that allegedly resulted from the prescription.

RESPONSE TO INTERROGATORY NO. 9:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definitions of the terms "HCP," "Patient," and "Opioid," as if fully set forth herein.

The State further objects to this interrogatory as overbroad, unduly burdensome, disproportionate to the needs of the case, calling for information that is not within the State's possession, custody or control, and seeking information that is irrelevant to the claims and defenses at issue in this case. The Interrogatory purportedly seeks information outside of the State's possessions, custody or control for patients not subject to SoonerCare. To the extent the State is in possession of current names and addresses of healthcare providers and patients that have participated in the SoonerCare program, despite the number of years spanned by the pharmacy claims at issue, such names and addresses must be cross-referenced through several data sets or information repositories. Many such names and addresses would likely be stale. Further, the names and addresses of healthcare providers and patients are irrelevant to the claims and defenses in this action and/or any minimal relevance of this information is substantially outweighed by the burden of providing it, especially if Defendant's request is interpreted as requesting *current* names and addresses, which change over time.

The State further objects to this Interrogatory as seeking information within Defendant's possession, custody or control. Specifically, Defendant monitors and tracks healthcare providers' prescribing practices and is aware of the providers who prescribe their medications. Indeed, Defendant utilizes such information to strategically determine which doctors to attack with its sales force and what sales tactics to deploy.

The State further objects to this interrogatory to the extent it attempts to suggest or assume the elements of any of the State's causes of action or otherwise seeks to impose any burden(s) or element(s) of proof that do not exist under or that are inconsistent with Oklahoma law. The State further objects to this Interrogatory to the extent that it assumes the State must prove "harm to the

Patient that allegedly resulted from the prescription" for any particular prescription or patient at issue in the case.

The State further objects to this interrogatory as seeking confidential and sensitive information protected from disclosure under both State and federal statutes, rules, regulations. Further, the State objects to this Interrogatory as seeking protected health information prohibited from disclosure under the Health Insurance Portability and Accountability Act ("HIPAA"), 42 C.F.R. Part 2, and other State and federal statutes, rules, and regulations.

The State further objects to this Interrogatory because it is a premature contention interrogatory that seeks to force the State to marshal all of its evidence, including expert evidence, before required or appropriate under the Rules of the Court's scheduling Order. See 12 OKLA. STAT. §3233(B). Further, the State will produce and disclose expert information in accordance with the scheduling Order entered by the Court.

The State further objects to this interrogatory as impermissibly compound because it indiscriminately groups numerous separate topics, subjects, questions and tasks under the guise of a single interrogatory. In reality, this Interrogatory is actually at least four (4) separate interrogatories improperly disguised as one. See 12 OKLA. STAT. §3233(A).

Finally, the State objects to this interrogatory as it exceeds to presumptive limit on interrogatories, which is 30, without leave of Court. Defendants are defending this litigation and conducting discovery pursuant to a joint defense agreement. As such, though Defendants' first interrogatories were divided into six sets from separate named Defendants, these first interrogatories were "joint requests" that sought information related to all Defendants simultaneously and were not limited to the serving Defendant (the "First Interrogatories"). The First Interrogatories consisted of at least 24 Joint Interrogatories, to which the State responded. As

such, following the First Interrogatories, each Defendant Family was left with, at most, 6 unused interrogatories. Indeed, the manner in which Defendants purportedly combined separate and distinct subparts into single interrogatories was improper and already far exceeded the presumptive 30-interrogatory limit. By the State's count, Defendants have collectively served 66 Joint Interrogatories when all separate and distinct subparts are properly counted. Nevertheless, the State has already responded to 6 additional interrogatories by each Defendant family.

INTERROGATORY NO. 10: Identify and describe all disciplinary proceedings, civil actions, or criminal charges brought or initiated by an Oklahoma Agency related to the opioid prescribing practices of any HCP identified in response to these Interrogatories.

RESPONSE TO INTERROGATORY NO. 10:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definitions of the terms "HCP" and "Oklahoma Agency," as if fully set forth herein.

The State further objects to this interrogatory as overbroad, unduly burdensome, disproportionate to the needs of the case, calling for information that is not within the State's possession, custody or control, and seeking information that is irrelevant to the claims and defenses at issue in this case.

The State further objects to this interrogatory to the extent it attempts to suggest or assume the elements of any of the State's causes of action or otherwise seeks to impose any burden(s) or element(s) of proof that do not exist under or that are inconsistent with Oklahoma law. The State further objects to this interrogatory as seeking confidential and sensitive information protected from disclosure under both State and federal statutes, rules, regulations. Further, the State objects to this Interrogatory as seeking protected health information prohibited from disclosure under the

Health Insurance Portability and Accountability Act ("HIPAA"), 42 C.F.R. Part 2, and other State and federal statutes, rules, and regulations.

The State further objects to this interrogatory as impermissibly compound because it indiscriminately groups numerous separate topics, subjects, questions and tasks under the guise of a single interrogatory. Nevertheless, the State has already responded to 6 additional interrogatories by each Defendant family.

INTERROGATORY NO. 11: For each disciplinary proceeding, civil actions, or criminal charge identified by You in response to Interrogatory No. 10, identify the Oklahoma Agency employee(s) responsible for conducting and supervising the investigation that preceded each disciplinary proceeding, civil actions, or criminal charge.

RESPONSE TO INTERROGATORY NO. 11:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definitions of the terms "You," "Your," and "Oklahoma Agency," as if fully set forth herein.

The State further objects to this interrogatory as overbroad, unduly burdensome, disproportionate to the needs of the case, calling for information that is not within the State's possession, custody or control, and seeking information that is irrelevant to the claims and defenses at issue in this case.

The State further objects to this interrogatory to the extent it attempts to suggest or assume the elements of any of the State's causes of action or otherwise seeks to impose any burden(s) or element(s) of proof that do not exist under or that are inconsistent with Oklahoma law. interrogatories were divided into six sets from separate named Defendants, these first interrogatories were "joint requests" that sought information related to all Defendants simultaneously and were not limited to the serving Defendant (the "First Interrogatories"). Nevertheless, the State has already responded to 6 additional interrogatories by each Defendant family.

INTERROGATORY NO. 12: State whether You have received any complaints regarding the opioid prescribing practices of any HCP identified in your responses to these Interrogatories, identify the HCP(s) against whom the complaints were made, the Oklahoma Agency that received the complaint, the Oklahoma Agency employee who was responsible for investigating the complaint, the date of the complaint, and the name and address of the person making the complaint, and describe the substance of the complaint.

RESPONSE TO INTERROGATORY NO. 12:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definitions of the terms "You," "Your," "HCP," and "Oklahoma Agency," as if fully set forth herein.

The State further objects to this interrogatory as overbroad, unduly burdensome, disproportionate to the needs of the case, calling for information that is not within the State's

possession, custody or control, and seeking information that is irrelevant to the claims and defenses at issue in this case.

The State further objects to this interrogatory to the extent it attempts to suggest or assume the elements of any of the State's causes of action or otherwise seeks to impose any burden(s) or element(s) of proof that do not exist under or that are inconsistent with Oklahoma law. The State further objects to this interrogatory as seeking confidential and sensitive information protected from disclosure under both State and federal statutes, rules, regulations. Further, the State objects to this Interrogatory as seeking protected health information prohibited from disclosure under the Health Insurance Portability and Accountability Act ("HIPAA"), 42 C.F.R. Part 2, and other State and federal statutes, rules, and regulations.

The State further objects to this interrogatory as impermissibly compound because it indiscriminately groups numerous separate topics, subjects, questions and tasks under the guise of a single interrogatory. In reality, this Interrogatory is actually at least seven (7) separate interrogatories improperly disguised as one. See 12 OKLA. STAT. §3233(A).

Finally, the State objects to this interrogatory as it exceeds to presumptive limit on interrogatories, which is 30, without leave of Court. Defendants are defending this litigation and conducting discovery pursuant to a joint defense agreement. As such, though Defendants' first interrogatories were divided into six sets from separate named Defendants, these first interrogatories were "joint requests" that sought information related to all Defendants simultaneously and were not limited to the serving Defendant (the "First Interrogatories"). Nevertheless, the State has already responded to 6 additional interrogatories by each Defendant family.

INTERROGATORY NO. 13: State whether any Oklahoma Agency initiated any investigation concerning the opioid prescribing practices of any HCP identified in your responses to these Interrogatories that did not result in disciplinary proceedings, civil actions, or criminal charges against the HCP, and identify the Oklahoma Agency, the HCP(s) investigated and the dates of the investigation(s), and describe the findings and conclusions of each investigation.

RESPONSE TO INTERROGATORY NO. 13:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definitions of the terms "You," "Your," and "Oklahoma Agency," as if fully set forth herein.

The State further objects to this interrogatory as overbroad, unduly burdensome, disproportionate to the needs of the case, calling for information that is not within the State's possession, custody or control, and seeking information that is irrelevant to the claims and defenses at issue in this case.

The State further objects to this interrogatory to the extent it attempts to suggest or assume the elements of any of the State's causes of action or otherwise seeks to impose any burden(s) or element(s) of proof that do not exist under or that are inconsistent with Oklahoma law. Further, the State objects to this Interrogatory as seeking protected health information prohibited from disclosure under the

Health Insurance Portability and Accountability Act ("HIPAA"), 42 C.F.R. Part 2, and other State and federal statutes, rules, and regulations.

The State further objects to this interrogatory as impermissibly compound because it indiscriminately groups numerous separate topics, subjects, questions and tasks under the guise of a single interrogatory. In reality, this Interrogatory is actually at least five (5) separate interrogatories improperly disguised as one. See 12 OKLA. STAT. §3233(A).

Finally, the State objects to this interrogatory as it exceeds to presumptive limit on interrogatories, which is 30, without leave of Court. Nevertheless, the State has already responded to 6 additional interrogatories by each Defendant family.

<u>INTERROGATORY NO. 14:</u> For each investigation identified by You in response to Interrogatory No. 13, identify the Oklahoma Agency employee(s) responsible for conducting and supervising the investigation.

RESPONSE TO INTERROGATORY NO. 14:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definitions of the terms "You," "Your," and "Oklahoma Agency," as if fully set forth herein.

The State further objects to this interrogatory as overbroad, unduly burdensome, disproportionate to the needs of the case, calling for information that is not within the State's possession, custody or control, and seeking information that is irrelevant to the claims and defenses at issue in this case.

The State further objects to this interrogatory to the extent it attempts to suggest or assume the elements of any of the State's causes of action or otherwise seeks to impose any burden(s) or element(s) of proof that do not exist under or that are inconsistent with Oklahoma law. The State further objects to this interrogatory as seeking confidential and sensitive information protected from disclosure under both State and federal statutes, rules, regulations. Further, the State objects to this Interrogatory as seeking protected health information prohibited from disclosure under the Health Insurance Portability and Accountability Act ("HIPAA"), 42 C.F.R. Part 2, and other State and federal statutes, rules, and regulations.

The State further objects to this interrogatory as impermissibly compound because it indiscriminately groups numerous separate topics, subjects, questions and tasks under the guise of a single interrogatory. See 12 OKLA. STAT. §3233(A).

Finally, the State objects to this interrogatory as it exceeds to presumptive limit on interrogatories, which is 30, without leave of Court. Defendants are defending this litigation and conducting discovery pursuant to a joint defense agreement. As such, though Defendants' first interrogatories were divided into six sets from separate named Defendants, these first interrogatories were "joint requests" that sought information related to all Defendants

simultaneously and were not limited to the serving Defendant (the "First Interrogatories"). The First Interrogatories consisted of at least 24 Joint Interrogatories, to which the State responded. As such, following the First Interrogatories, each Defendant Family was left with, at most, 6 unused interrogatories. By the State's count, Defendants have collectively served 66 Joint Interrogatories when all separate and distinct subparts are properly counted. Nevertheless, the State has already responded to 6 additional interrogatories by each Defendant family.

INTERROGATORY NO. 15: Identify each "misrepresentation" or "omission" by Cephalon regarding opioids, as alleged in paragraph 118 of the Petition, each "condition" "created" by each identified misrepresentation and omission, *id.*, and identify each individual "communit[y], neighborhood[]," and "person[]," *id.*, affected by the misrepresentations and omissions You identified.

RESPONSE TO INTERROGATORY NO. 15:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definitions of the term "You," as if fully set forth herein.

The State further objects to this Interrogatory because it is a premature contention interrogatory that attempts to force the State to marshal all of its evidence, including expert evidence, before required or appropriate under the Oklahoma Cody of Civil Procedure or the Court's scheduling Order. See 12 OKLA. STAT. §3233(B). Further, the State will produce and disclose expert information, including the expert "methods, criteria, information, reports, studies,

and medical or scientific research" called for by this Interrogatory, in accordance with the scheduling Order entered by the Court.

The State further objects to this interrogatory as overbroad, unduly burdensome, disproportionate to the needs of the case, calling for information that is not within the State's possession, custody or control, and seeking information that is irrelevant to the claims and defenses at issue in this case. The request to identify each and every misrepresentation made by Defendants related to both branded opioids and opioids generally-all of which misrepresentations were intended to change the way healthcare providers thought about opioids and to encourage overprescribing of opioids—for a period of over two decades is overbroad and unduly burdensome on its face. Further, the State is not required in this litigation to identify each and every misrepresentation made by defendants or to tie specific misrepresentations to each false or fraudulent claim reimbursed by the State. The request to identify each and every "condition' 'created'" by Defendants false marketing and misrepresentation and each individual, community, neighborhood, and person affected by Defendants' behavior and deadline products—all for a period of over two decades—is overbroad and unduly burdensome on its face, as the opioid addiction and overdose epidemic has ravaged this State, its family, and its citizens with unimaginable loss, tragedy, and expense. The State will prove its claims as required by Oklahoma law and in accordance with the applicable rules of evidence.

The State further objects to this interrogatory to the extent it attempts to suggest or assume the elements of any of the State's causes of action or otherwise seeks to impose any burden(s) or element(s) of proof that do not exist under or that are inconsistent with Oklahoma law. The State further objects to this interrogatory as seeking confidential and sensitive information protected from disclosure under both State and federal statutes, rules, regulations. Further, the State objects

to this Interrogatory as seeking protected health information prohibited from disclosure under the Health Insurance Portability and Accountability Act ("HIPAA"), 42 C.F.R. Part 2, and other State and federal statutes, rules, and regulations.

The State further objects to this interrogatory as impermissibly compound because it indiscriminately groups numerous separate topics, subjects, questions and tasks under the guise of a single interrogatory. In reality, this Interrogatory is actually at least six (6) separate interrogatories improperly disguised as one. See 12 OKLA. STAT. §3233(A).

Finally, the State objects to this interrogatory as it exceeds to presumptive limit on interrogatories, which is 30, without leave of Court. Defendants are defending this litigation and conducting discovery pursuant to a joint defense agreement. As such, though Defendants' first interrogatories were divided into six sets from separate named Defendants, these first interrogatories were "joint requests" that sought information related to all Defendants simultaneously and were not limited to the serving Defendant (the "First Interrogatories"). By the State's count, Defendants have collectively served 66 Joint Interrogatories when all separate and distinct subparts are properly counted. Nevertheless, the State has already responded to 6 additional interrogatories by each Defendant family.

INTERROGATORY NO. 16: Described any injunctive relief that You are seeking to abate the "public nuisance," Petition, Prayer ¶ K, including all Cephalon conduct You seek to

prohibit to abate the "public nuisance" and all conduct You seek to compel from Cephalon to abate the "public nuisance."

RESPONSE TO INTERROGATORY NO. 16:

The State incorporates its general objections and objections to Defendant's instructions and definitions above, including the State's objections to Defendant's definitions of the terms "You," as if fully set forth herein.

The State further objects to this Interrogatory because it is a premature contention interrogatory that attempts to force the State to marshal all of its evidence, including expert evidence, before required or appropriate under the Oklahoma Cody of Civil Procedure or the Court's scheduling Order. *See* 12 OKLA. STAT. §3233(B). Further, the State will produce and disclose expert information, including the expert "methods, criteria, information, reports, studies, and medical or scientific research" called for by this Interrogatory, in accordance with the scheduling Order entered by the Court.
